2. INTRODUCTION

Feller Protocol

We are in a new era of coins and tokens. More and more competitive in the market.

We are following wear and tear of coins that only increase their volumes in the market, but with little liquidity. For they are usually pulled by miners and large holders of coins. We believe that with the burn and with adequate supply a coin can become notorious in the market taking the medium and long term satisfactory profitability to people who own.

We have all seen or lived situations where the coins are offered at exorbitant prices to the initial buyers, values that we believe are not appropriate because when a coin is released on Exchanges, its value initially retracts, so why buy a coin at a high price where only people with high purchasing power will have greater results or even greater reductions?

Thinking about this scenario and having experienced it, we decided to get together and launch Feller. A token with a burn and retribution for holders. Besides this burn and a supply considered adequate, we believe that it can have a very low initial value, giving opportunity to big and small to take advantage of this market that is fantastic.
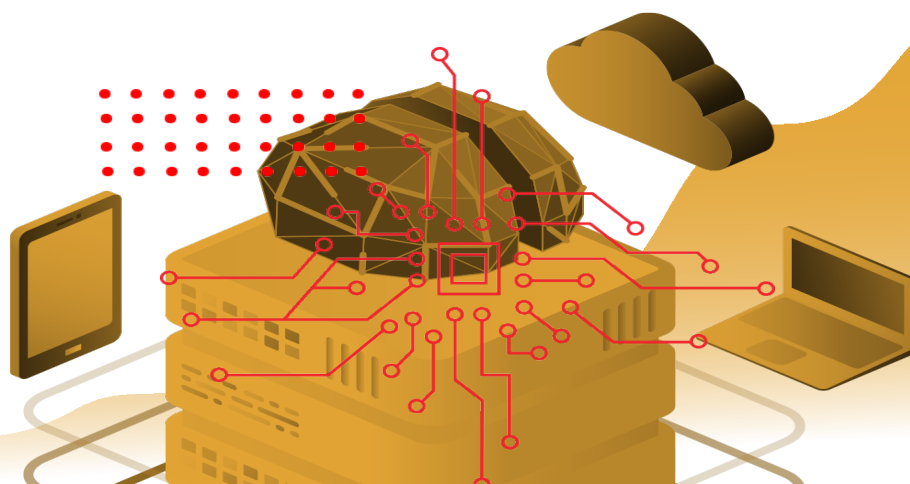

3. CRYPTOCURRENCY PROJECT

Why static reward?

Static reward solves several problems. This reward is derived from the volume of coins on the market, that is, from the trading earned. With this mechanism will decrease the selling pressure by increasing the demand for token purchase.

With this mechanism the people who hold the currency, will have an increasing interest in obtaining more tokens, drastically decreasing the sales, because the greater the number accumulated the greater your rewards via kick-backs.

Manual Burns

A continuous burn can hurt a project of such greatness, as it can interfere with rewards, but a manual burn will give sustainability and continued rewards for all Feller holders. We believe that burns should be done as the project progresses, giving smoothness and constancy in good work.

The burnings will be announced and tracked by the community who will be able to follow along.

Feller came to be similar but at the same time different from other coins and tokens.
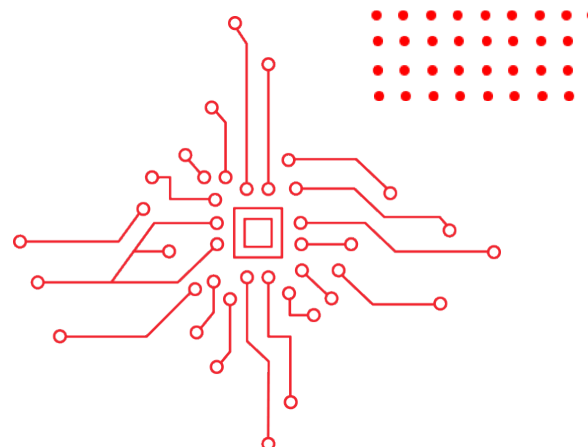

4. LIQUIDITY

Automatic Liquidity Pool (LP)

Automatic LP is the FELLER differentiator. The contract sucks in tokens from sellers and buyers, and adds them to the settlement pool, creating a solid FELLER price.

The penalty acts as an arbitrage-resistant mechanism that guarantees FELLER volume as a reward for holders. The added LP creates a stability of the LP provided by adding the tax to the overall liquidity of the token, thus increasing overall LP tokens and supporting the token's price floor. This is different to the burn function of other reflection tokens which is only beneficial in the short term of the granted reduction in supply. As the LP of the FELLER token increases, the price stability reflects this function with the benefit of solid price and reward for holders. The goal is to prevent whales from deciding to sell their tokens later and harming other holders. This is all in an effort to alleviate some of the problems we have seen with the current 'DeFi reflection tokens. With this protocol we are using will prevail over the other outdated ones.
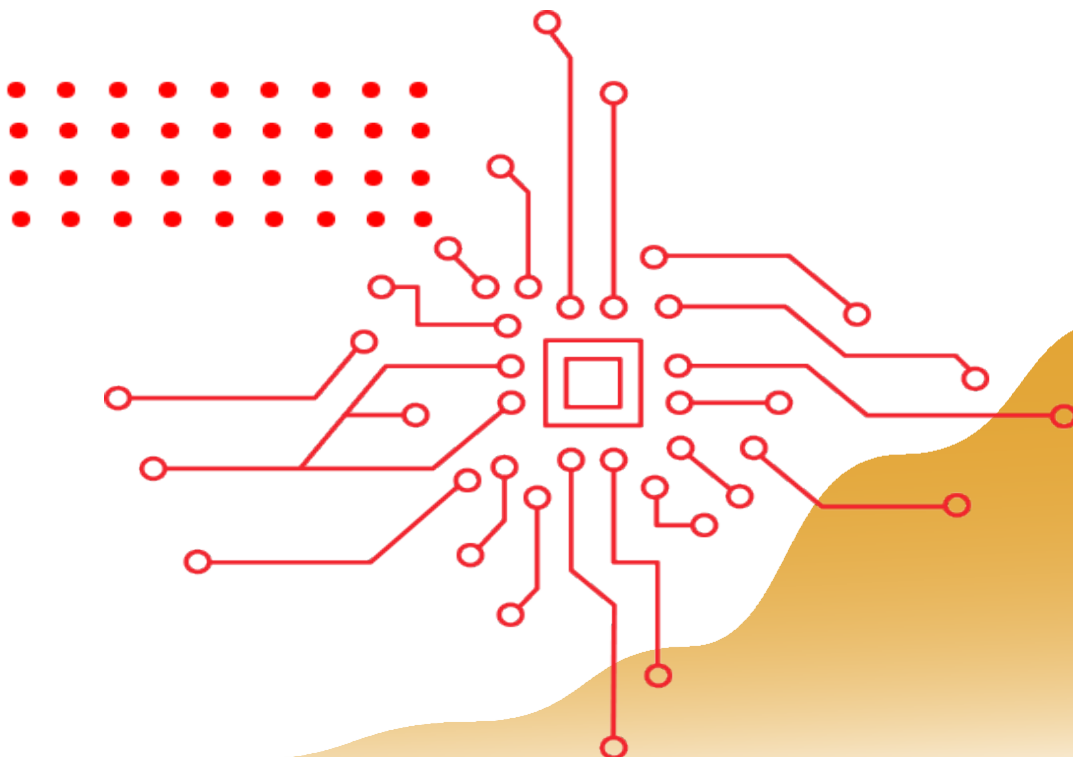

5. TOKENOMIC

Tokenomics

Total Supply: 2,000,000,000

DEV tokens for initial burn: 50,000,000

Reserve Fund Tokens: 200,000,000

Airdrop Tokens: 20,000,000

Humanitarian aid tokens: 20,000,000

Fair Launch Offer: 1,710,000,000

FELLER protocol

FELLER employs 3 functions: Reflection + LP acquisition + Burn.

On each trade, the transaction is taxed at a rate of 10%, which is split 2 ways.

- 5% fee = redistributed to all existing holders

- The 5% fee is split 50/50 half of which is sold by the contract to BNB, while the other half of the FELLER tokens are automatically paired with the aforementioned BNB and added as a liquidity pair on PancakeSwap.

IMPORTANT REMARK:

As it is laid out in our project, besides the burning and the reward for those who hold the coin. Who will have the power over the coins are the people, the community and not the creators. For the goal is that the whole community is with the currency unlike other projects that the DEV is with most part. In Feller it will be in the hand of each person who acquires the currency.

APPLICATION:

According to the map, an Android and IOS app will be launched, which will allow you to send and receive your coins quickly and safely.

Tokenomics

Step by step plan to ensure 100% safety.

- Step 1

DEV will burn 50,000,000 tokens in the DEV Wallet 20 days before launch on the Exchange.

- Step 2

Fair launch at DxSale.

- Step 3

LP locked in DxLocker for 2 years.

-Step 4
LP generated with each trade and locked in the Portfolio.

On each trade, the transaction is taxed at a rate of 10%, which is split 2 ways.

We are investors and passionate about cryptocurrencies. With years of studies and knowledge in the area.
Now we are focused on doing something innovative to reach all people seeking hope in the crypto market.

We are a team that has already created and qualified some coins in the market, but now we are launching Feller with the purpose of inserting reaching all the people in the world.
We are a total of 8 people who are launching something innovative, because we believe that distributed profits is the best for a whole community.
Welcome to FELLER

12. OBJECTIVE

We will finish our marketplace app and start our own charity project. We will start a community listing donation increase for various exchanges (i.e. Coinbase, Binance, Kraken). We will finish our NFT exchange and launch our first video game with FELLER integrated. We will expand the team by 25% and do a community meetup (pending COVID restrictions). We will also be integrating with other major exchanges (i.e. Binance, Mandala).

Rocket has no reverse!

We will finish the FELLER Exchange and our charity project. We will finish the integrations with our first African market and start the next integrations with other African markets. We will create a FELLER Office based in Africa and start hiring in these markets to create jobs. We will take donations for our next charity project and start a vote on the next project as well. We will establish a FELLER Fellowship this quarter as well.

This project was conceived in the greatest entrepreneurs in history. John Hock Feller who along with his son John D. Rockefeller Jr. donated more than 1 billion and helped thousands of families. We believe that working in a continuous and honest way we will reach places never reached.
